

# Answer our 10 big questions

1. What do you think about our vision for North East Cambridge?

Comment

Please do not destroy the green belt to allow greater congestion and overcrowding of Cambridge

2. Are we creating the right walking and cycling connections to the surrounding areas?

Comment

no one is fixing the river crossing at Barts Bite to allow bikes/pushchairs/wheelchairs to cross with out being carried - this route is heavily used for leisure + commuting

3. Are the new 'centres' in the right place and do they include the right mix of activity?

Comment

no - just high density housing

4. Do we have the right balance between new jobs and new homes?

Comment

there will be jobs in construction + hotels - little else  
Do people still need to live close to their work in city centres anyway?

5. Are we are planning for the right community facilities?

Comment

for what I have read the sites for swimming pools etc have yet to be established

6. Do you think that our approach to distributing building heights and densities is appropriate for the location?

Comment

This will be the highest density housing outside London  
habits have changed in 2020 - people want more space, gardens and access to countryside  
(if the countryside you are destroying by moving the sewage works).

Please turn over for questions 7-10 ...

7. Are we planning for the right mix of public open spaces?

Comment

only by destroying other pre-existing public spaces

8. Are we doing enough to improve biodiversity in and around North East Cambridge?

Comment

No - you are industrialising green belt land to allow development on a brown field site ie relocating the sewage works - most probably to Henny Lee (1 mile from the Ditcher Primary School!)

9. Are we doing enough to discourage car travel into this area?

Comment

No - all these homes will have cars. There will also be a huge increase in industrial traffic associated with the new sewage works that will create huge obnoxious risk school children, lives and harm the environment

10. Are we maximising the role that development at North East Cambridge has to play in responding to the climate crisis?

Comment

NO! You are destroying countryside in green belt land to allow the construction of new ~~low~~ development with a housing density that rivals central London - do people really want this in a post-COVID era??
