Dear Sir/ Madam,

LAND OFF TATES FIELD, CAXTON

GREATER CAMBRIDGE LOCAL PLAN CALL FOR SITES SUBMISSION

I write on behalf of our client, Gonville and Caius College, to submit 'Land off St Peter's Lane, Caxton' (hereafter referred to as 'the site') for consideration via the Greater Cambridge Local Plan Call for Sites consultation. Two submissions are made for the site, one comprising the site as a whole, and a separate submission with an access provided on Tates Field. This is to enable both sites to be assessed and to enable a conversation to be had regarding the scale of development and the scale of the benefits that are appropriate for Caxton in the upcoming Local Plan period. The remainder of this letter relates to the smaller of these sites and provides a site description, sets out the context and background of the site, describes the potential development proposals that the site could accommodate and lists the benefits that the development could deliver. I enclose the following as part of the submission:

- Site proforma; and
- Site Location Plan.

Site Description & Deliverability

The site is located in the centre of Caxton, outside the village framework within South Cambridgeshire District Council (SCDC). The site measures 0.7 hectares and is currently in agricultural use

The site is not within the Green Belt, which has been a long time, major constraint on the spatial strategy in South Cambridgeshire.

The site is located within a good position in terms of its proximity to Cambourne, a higher order service centre. Highways England announced in February 2019 their preferred route for the A428 Black Cat to Caxton Gibbet improvements. This represents a significant investment (£810m to £1.4bn) and will help improvement transport connections to Caxton. The Greater Cambridge Partnership is also funding improvements to the other A428 to the east of Caxton which will help connect Cambourne to Cambridge. This should benefit connectivity to Caxton.

Caxton Village Conservation Area is located to the east of the site. The eastern boundary of the site is well screened by existing trees and hedgerows. Caxton Hall, a Grade II* listed building is located to the north of the site and is well screened by trees. Firs Farmhouse, a Grade II listed building, is located 40m

Bidwell House, Trumpington Road, Cambridge CB2 9LD
T: 01223 841841 E: info@bidwells.co.uk W: bidwells.co.uk

to the south-west of the site. There is less screening of this building, however full consideration would be given to how development on the site could sensitively respond and incorporate surrounding heritage assets.

The site is within an area of low flood risk (Flood Zone 1) and is therefore in a low risk flood area.

The site is relatively flat, comprising an open field with trees along its boundaries. There are no other significant physical constraints on the site such as tree protection orders or public rights of way.

Relevant Planning History

No planning applications have been submitted on the site. The site has not previously been submitted as part of the Council's previous Call for Sites processes.

Caxton

Caxton is an Infill Village in the settlement hierarchy within the adopted Local Plan. There are bus services which connect Caxton to Cambourne and Cambridge (bus routes 18 and 28).

Development Proposals

The site could accommodate a landscape design-led residential development of up to 15 residential units. This would include 40% affordable housing, landscaping, vehicular access and formal and informal open space.

It would form a logical extension to the village and relate well to the urban grain formed by the adjoining development.

Benefits

It is considered that the development proposals could deliver numerous social, economic and environmental benefits to the local area, including:

- The opportunity to deliver affordable housing to help meet the needs of Caxton and the local area;
- A landowner who wishes to work the community in order to shape a proposal which meets the needs of and can provide wider benefits to the village;
- Providing new development in an area that will see significant investment in transport infrastructure;
- Opportunity for public open space and play space;
- Supporting Caxton's economy, including local shops and services at a time when villages are seeing a reduction in services and facilities; and
- Enhancing biodiversity levels across the site from its existing low ecology value.

Summary

Gonville and Caius College are seeking an allocation for residential development on a land parcel that is well-related to the village form and to deliver that development in a manner that will bring the greatest benefits to the community. The development can also come forward in a way to contribute to the work already undertaken by the Local Authorities to deliver transport and infrastructure improvements that are already earmarked for this part of the District.

The land identified is available, achievable and deliverable. The intention is to provide planned and coordinated development in a manner to benefit the whole village.
